Hair Removal

Waxing is a great hair removal method for both male and female clients. Waxing hair removes hair at the root and causes it to grow back much slower and less thick over time and in some areas hair may never grow back at all.

Waxing exfoliates the upper layer of the skin and leaves it feeling soft and silky with results lasting up to 4 weeks. Our wax bar is specifically designed for use with all skin types. We do NOT double dip during any waxing to avoid all contamination. Leave the razor blade behind and visit our wax bar for long lasting benefits for your skin.
